GREETINGS FROM DPS FRATERNITY

“Keep the child’s brain active over break without them knowing they’re doing homework”

Dear Parents,

The much awaited summer break is here! This is the time that children enjoy the most. Along with all the fun activities that they will do, we would also like to keep them productively occupied with some academic work. At DPS, our goal is to provide continuous educational opportunities and practice for students. We believe, together, we will write the BEST story for our children!

“Each child is an individual and must be allowed to bloom, express his feelings and ideas.”

A few worksheets of each subject have been prepared to help your child revise the concepts done in the class. You are requested to take print outs of the worksheets. Please ensure that your child spends some time everyday to complete these worksheets. Let them first attempt it themselves. Assist them only when required. They will surely enjoy doing them.

Wishing all the children “HAPPY HOLIDAYS”

MATHS

SUDOKU-There are many different sudoku variations. 4x4 sudoku is one of them. It has **four rows, four columns and four boxes** where the classic version has nine rows, nine columns and nine boxes. The 4x4 version is often called "sudoku for kids" because they are much simpler puzzles to solve. In this player insert the numbers one to four into a grid consisting of four squares subdivided into a further four smaller squares in such a way that every number appears once in each horizontal line, vertical line, and square.
